Artemotial® α - β Arteether is an oil-soluble ethyl ether derivative of dihydroartemisinin, which is an efficient erythrocytic schizonticidal drug for the treatment of multi-drug resistant falciparum malaria. It is available as injection for intramuscular use only. Artemotial α - β Arteether shows rapid schizonticidal action and brings about quick clinical improvement in falciparum malaria with low recrudescence rate. It has some gametocidal action too, which aids in cutting down the transmission of falciparum malaria.

Artemotial®
