(Cefpodoxime Proxetil) Tablets

CEPTRADIN[®]

(Cefpodoxime Proxetil) Tablets

CEPTRADIN[®] (Cefpodoxime Proxetil) Tablets is a medicine which is used in bacterial infections. The information in this Medicine Guide for Cefpodoxime Proxetil varies according to the condition being treated and the particular preparation used.

CEPTRADIN[®] is used to treat certain types of bacterial infections. It works by killing certain types of bacteria. Do not share your medicine with other people. It may not be suitable for them and may harm them. The pharmacy label on your medicine tells you how much medicine you should take. It also tells you how often you should take your medicine. This is the dose that you and your prescriber have agreed you should take. You should not change the dose of your medicine unless you are told to do so by your prescriber. If you feel that the medicine is making you unwell or you do not think it is working, then talk to your prescriber. CEPTRADIN[®] Cefpodoxime proxetil is indicated for the treatment of patients with mild to moderate infections caused by susceptible strains of the designated microorganisms in the conditions listed below.

Recommended dosages, durations of therapy, and applicable patient populations vary among these infections. **DOSAGE AND ADMINISTRATION** for specific recommendations. Acute otitis media caused by *Streptococcus pneumoniae* (excluding penicillin-resistant strains), *Streptococcus pyogenes*, *Haemophilus influenzae* (including beta-lactamase-producing strains), or *Moraxella (Branhamella) catarrhalis* (including beta-lactamase-producing strains).
