THE BENEFITS OF DUECTRA® (ibuprofen and famotidine) TABLETS 800 MG/26.6 MG  
DUECTRA is designed to help relieve your osteoarthritis or rheumatoid arthritis symptoms and to help protect your upper digestive system from ulcers caused by ibuprofen. Your health care provider may prescribe 1 DUECTRA tablet 3 times a day. This schedule results in a daily dose of 2400 mg of ibuprofen and 80 mg of famotidine—prescription-strength doses of both medicines.

**Duectra**®  
(ibuprofen & famotidine) Tablets  
800 MG/26.6 MG

Treatment for: Osteoarthritis, Rheumatoid Arthritis, NSAID-Induced Ulcer Prophylaxis  
DUECTRA (ibuprofen and famotidine) is an NSAID and histamine H2-receptor antagonist combination indicated for the relief of signs and symptoms of rheumatoid arthritis and osteoarthritis and to decrease the risk of developing upper GI ulcers.  
DUECTRA tablets should be swallowed whole.  
Do not chew, break or crush the tablets.

(ibuprofen & famotidine) Tablets  
800 MG/26.6 MG

**Duectra® (ibuprofen and famotidine): For the relief of rheumatoid arthritis and osteoarthritis and prevention of gastric ulcers.**  
**THE POWER OF PRESCRIPTION-STRENGTH IBUPROFEN COMBINED WITH  
THE CONVENIENCE OF BUILT-IN GASTROPROTECTIVE THERAPY**

Approved Uses For DUECTRA (ibuprofen and famotidine) tablets, for oral use)

DUECTRA, a combination of the NSAID ibuprofen and the histamine H2-receptor antagonist famotidine, is indicated for the relief of signs and symptoms of rheumatoid arthritis and osteoarthritis and to decrease the risk of developing upper gastrointestinal ulcers, which in the clinical trials was defined as a gastric and/or duodenal ulcer, in patients who are taking ibuprofen for those indications. The clinical trials primarily enrolled patients less than 65 years of age without a prior history of gastrointestinal ulcer. Controlled trials do not extend beyond 6 months.

#### DOSAGE AND ADMINISTRATION -----

- One DUECTRA tablet administered orally three times per day

#### -----DOSAGE FORMS AND STRENGTHS -----

- Tablets: 800 mg ibuprofen and 26.6 mg famotidine. DUECTRA (ibuprofen and famotidine) delivers the convenience of a 2-in-1 tablet .

Active ingredients: ibuprofen and famotidine.

The first and only 2-in-1 tablet that combines prescription-strength (800 mg) ibuprofen with built-in protective therapy (famotidine).

With DUECTRA, you have:

**POWER** : Prescription-strength dose of ibuprofen (800 mg) for the relief of pain and inflammation associated with osteoarthritis and rheumatoid arthritis

**PROTECTION** : Gastroprotective medicine (famotidine) is built into every dose

**CONVENIENCE** : 2-in-1 tablet so you only have a single prescription.

DUECTRA is a combination tablet that delivers 2 drugs at the same time. Each 2-in-1 DUECTRA tablet combines 800 mg of ibuprofen and 26.6 mg of the stomach acid reducer famotidine.

With DUECTRA, you'll be able to take a single tablet that offers:

Relief of pain and inflammation associated with osteoarthritis or rheumatoid arthritis with the power of prescription-strength (800 mg) ibuprofen

The convenience of built-in gastroprotective therapy that comes from prescription-strength (26.6 mg) famotidine.

**Food and Drug Administration (FDA) approved .Prescription Only (POM)**
