endolanz®
CYCLOPHOSPHAMIDE
Tablets & Injection

Endolanz® Cyclophosphamide is used to **treat several types of cancer. Cyclophosphamide is also used to treat certain cases of nephrotic syndrome (kidney disease) in children.**

Uses

Cyclophosphamide is used to **treat various types of cancer. It is a chemotherapy drug that works by slowing or stopping cell growth. Cyclophosphamide also works by decreasing your immune system's response to various diseases.** It is used to treat a certain type of kidney disease in children after other treatments have not worked.

How to use Cyclophosphamide

Take this medication by mouth exactly as directed by your doctor. The dosage is based on your medical condition, weight, response to treatment, and other treatments (such as other chemotherapy drugs, radiation) you may be receiving. Be sure to tell your doctor and pharmacist about all the products you use (including prescription drugs, nonprescription drugs, and herbal products).

During treatment with this medication, you must drink more fluids than usual and pass urine frequently to help avoid kidney and bladder side effects. Ask your doctor how much you should drink and how often to empty your bladder each day, and follow these instructions carefully. If you are using the capsules, swallow them whole. Do not open, chew, or crush the capsules. If you have accidental contact with broken capsules, wash your hands thoroughly right away.

Since this drug can be absorbed through the skin and lungs and may harm an unborn baby, women who are pregnant or who may become pregnant should not handle this medication or breathe dust from the tablets or capsules.
