Modified Release Capsules

Quoxart® MR is a combination of two medicines; dutasteride and tamsulosin hydrochloride. Dutasteride belongs to a group of medicines **called 5-alpha reductase enzyme inhibitors and tamsulosin hydrochloride** belongs to a group of medicines called alpha-blockers. These medicines can be used either alone or in combination in men who have a condition known **as benign prostatic hyperplasia (BPH).**

Quoxart® MR is a combination of dutasteride, a 5 alpha-reductase inhibitor, and tamsulosin, an alpha adrenergic antagonist, **indicated for the treatment of symptomatic benign prostatic hyperplasia (BPH) in men with an enlarged prostate.**

Limitations of Use: Dutasteride-containing products, including Quoxart®, are not approved for the prevention of prostate cancer.

Quoxart® MR 0.5 mg dutasteride and 0.4 mg tamsulosin hydrochloride.

Dutasteride 500 mcg and tamsulosin HCl 400 mcg

- Take one capsule daily approximately 30 minutes after the same meal each day.
- Swallow capsule whole.

Quoxart® MR is a prescription medicine that contains 2 medicines: dutasteride and tamsulosin. Quoxart® is used to treat the symptoms of benign prostatic hyperplasia (BPH) in men with an enlarged prostate.
