

Temasil®

Ebastine 10/20mg

Temasil® Ebastine in allergic rhinitis and chronic idiopathic urticaria.
Also used to treat hay fever symptoms such as watery eyes, itchy nose, sneezing and hives.

NON-SEDATING SECOND GENERATION ANTIHISTAMINE

What is Temasil®?

Temasil® is a non sedating antihistamine agent useful for symptomatic relief of allergic conditions such as allergic rhinitis and skin disorders. It works by blocking receptors from reacting when in contact with allergen. It does not break the blood brain barrier easily to prevent any sedating effects. It can be used to treat hay fever symptoms such as watery eyes, itchy nose, sneezing and hives.

How is Temasil® used?

Temasil® is usually taken orally once per day with water and can be taken with or without food.

The recommended dose is 10mg per day, however, dosage will depend on the patients condition and response to the medication, contact a doctor for correct dosage. It is a relief treatment for the allergic symptoms and cannot be used as a cure for symptoms.

Temasil® Ebastine is a *non-sedating H1 antihistamine*. It is normally used to treat symptomatic seasonal allergic rhinitis (SAR) This drug does not penetrate the blood-brain barrier and therefore allows an effective block of the H1 receptor in peripheral tissue without a central side effect. In other words, it does not cause sedation or drowsiness.
